

Digital column scale with very high capacity seca 703

new

- Very high capacity of 250 kg and stability
- Safe footing on large, stable platform
- Integrated BMI function
- Durable construction

A performer without compromise

Ascertaining the patient's weight is routine in everyday professional health care. seca has now developed the digital column scale 703 for use wherever weighing has to be quick and simple. Determining the weight of patients, however heavy, is now child's play: the scale's design is compact but, at the same time, generous so that even heavy patients can be weighed comfortably. The extremely high capacity of 250 kg and the fully digital technology also ensure maximum weighing comfort. This scale is especially suitable for use in the general and internal medical sectors. Thanks to its robust construction, it is also the ideal scale for use, for example, in fitness studios or pharmacies.

Very high capacity and stability

The seca 703 is suitable for weighing heavy-weight patients. In addition to having a high load-bearing capacity of 250 kg it also has a sizable but low platform. The cast iron base gives the scale its excellent stability. And as the platform is especially large, this professional scale is safe and comfortable to mount. The ribbed rubber mat is an additional feature ensuring a very safe footing.

Checking the nutritional condition with the BMI function

After weighing the patient and entering the patient's height, the BMI value can quickly and easily be determined at the touch of a button. This value provides reliable information on the patient's nutritional condition. With the optional integrable measuring rod seca 220, the patient's height can be measured at the same time.

Comfortable weighing due to TARE and HOLD functions

With the TARE function, it is possible to determine the exact net weight when the patient is dressed or is using an aid when mounting the scale. The HOLD function stores the weight on the display for three minutes after weighing, meaning that the person weighed can first be taken care of before one has to note down the result.

Flexible in use and almost maintenance-free

The column scale seca 703 can be used flexibly not only because it is easy to move around on the integrated castors but also because it can be operated on battery power, meaning it does not depend on a mains supply. Up to 16,000 weighings are possible with just one set of batteries.

Technical data

seca 703

- Capacity: 250 kg / 550 lbs
- Graduation: 100 g / 0.2 lbs
- Dimensions (WxHxD): 360 x 930 x 520 mm
- Platform (WxHxD): 350 x 84 x 360 mm
- Weight: 16 kg
- Power supply: Batteries / mains adapter (optional)
- Approval class: unapproved
- Functions: TARE, HOLD, BMI, kg/lbs switch-over
- Optional: Measuring rod seca 220
